

PALAM BRAHMA REDDY

Java Backend Engineer | Spring Boot | Microservices

Hyderabad, India | +91 9392455293 | brahmaredrypalem5757@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Engineer with hands-on production experience building **scalable REST APIs and microservices** using **Java 17/21, Spring Boot 4.0, Spring Security, and Hibernate/JPA**. Currently focused on **system design and scalability** while contributing to an enterprise microservices platform spanning booking, payment, and notifications. Independently built and deployed two **production applications** — a customer-facing e-commerce platform and a WhatsApp-chatbot-driven subscription platform — serving 750+ combined users, integrating **PostgreSQL, MySQL, Redis, AWS S3, JWT, Razorpay, and Shipping/WhatsApp APIs**.

TECHNICAL SKILLS

- **Languages:** Java 17, Java 21, SQL, JavaScript (ES6)
- **Backend Frameworks:** Spring Boot 4.0, Spring Security, Spring Data JPA, Hibernate, Microservices Architecture, RESTful APIs
- **Database & Caching:** PostgreSQL, MySQL, Redis, Query Optimization, Indexing, DBMS
- **Security & Auth:** JWT Authentication, Role-Based Access Control (RBAC), Distributed Locking
- **Cloud & Integrations:** AWS S3, Razorpay Payment Gateway, Shipping API, WhatsApp Business API & Chatbot, Swagger/OpenAPI
- **System Design & Tools:** Scalability patterns, caching strategy, query optimization, Git, GitHub, Postman, Agile/Scrum, MVC Architecture

PROFESSIONAL EXPERIENCE

Java Backend Developer Intern

Dec 2025 – Present

ValueMore Tec LLP | Remote

- Built and maintained production-grade REST APIs with **Java, Spring Boot, Spring Security, Hibernate, and PostgreSQL** for a high-scale microservices platform.
- Developed backend modules for **booking, payment, notifications, and partner management**, collaborating with cross-functional teams in an Agile/Scrum environment.
- Designed and tuned **PostgreSQL schemas, queries, and indexes**, improving application query performance.
- Implemented **JWT-based authentication, role-based authorization, Redis caching, and distributed locking** to secure and scale backend services.
- Integrated **AWS S3** for secure file storage, **Razorpay** for payment processing, and **Swagger/OpenAPI** for API documentation.
- Currently focused on **system design and scalability** of production services — evaluating caching strategy, query optimization, and service boundaries for higher traffic — alongside API design and peer code reviews.

PROJECTS

E-Commerce Management Platform — Live Production

Tech Stack: Java 21, Spring Boot 4.0, Spring Security, Hibernate, PostgreSQL, MySQL, Razorpay, Shipping API, WhatsApp API, REST APIs

- Built and deployed a **production monolithic backend** powering a live e-commerce platform serving **500+ website visitors**, covering product browsing, cart, and checkout.
- Integrated **Razorpay Payment Gateway** for order payment collection at checkout with automated invoice generation.
- Built an **admin order-booking workflow integrated with a Shipping API** to generate and track shipments once payment is confirmed.
- Automated **order and shipment status updates to customers via WhatsApp API**, from order confirmation through delivery.
- Implemented **JWT authentication and Role-Based Access Control (RBAC)** across RESTful APIs to separate customer and admin access.

Milk Delivery Subscription Platform — Live Production

Tech Stack: Java 21, Spring Boot 4.0, Spring Security, Hibernate, MySQL, Redis, AWS S3, Razorpay, WhatsApp Chatbot API, REST APIs

- Designed and deployed an **admin- and delivery-partner-facing backend** for a subscription milk delivery service serving **250+ active subscribers**, with customers ordering entirely through a **WhatsApp chatbot** (no separate customer app).
- Built automated **invoice generation**, storing invoices in **AWS S3** and delivering them to customers via WhatsApp with an embedded **Razorpay payment link** for collection.
- Built a **Partner Dashboard** for delivery partners to manage daily deliveries and an **Admin Dashboard** for subscription management, order assignment, invoicing, and payment tracking.
- Designed **recurring subscription and delivery-scheduling logic** on **MySQL**, with **Redis** caching to keep daily delivery workflows responsive.

EDUCATION

B.Tech, Computer Science and Engineering

Dec 2021 – May 2025

Sheshadri Rao Gudlavalleru Engineering College, Gudlavalleru | CGPA: 7.91 / 10

Intermediate (MPC Stream)

Jun 2019 – Apr 2021

Sri Saraswathi Junior College, Ongole | 958 / 1000
